

Extending The Life Of Metals With Protekote

Protekote 910

Protekote 910 is an industrial topcoat designed to give excellent dry lubrication and non-stick properties combined together in one coating.

Uses include: Fans, heat sealing equipment, fusion irons, and faces.

Fusion Faces

PROPERTIES:

	Abrasion Resistance	Chemical Resistance	Thermal Properties	Electrical Insulation	FDA
PROTEKOTE 910	Fair	Excellent	Excellent	Fair	NO

See full property sheet for more detail.

Teflon® Ceramic

Designed for end uses where high temperature is a concern, this coating will still offer great release characteristics. Fits many applications where food approvals are a concern.

This coating sees use for many types of heat sealing applications big and small.

Heat Sealing Plates

PROPERTIES:

	Abrasion Resistance	Chemical Resistance	Thermal Properties	Electrical Insulation	FDA
TEFLON® CERAMIC	Excellent	Very Good	Excellent	Good	OK

See full property sheet for more detail.
